# 地基工程

海帆道

泰昇負責為8座樓宇、平台及會所建造 地基工程,包括挖掘及在椿帽旁邊加以 支撐,而其中4座樓宇之地基是以72支 鑽孔椿建造,另外2座樓宇之地基則以 580支鋼工字椿建造。平台及會所之 地基則分別以540支鋼工字椿及60支 預鑽石孔之鋼工字椿建造。業主基於 泰昇以往的良好工作記錄,所以用協商 的形式批出這項工程。雖然工程龐大及 時間緊迫,但仍能如期完成。

#### Hoi Fan Road

### **Foundation Works**

The project consisted of 8 tower blocks, podium and clubhouse and Tysan was responsible for constructing their foundation inclusive of excavation and lateral support works for the caps. Foundation for 4 tower blocks consisted of 72 bored piles and 2 tower blocks consisted of 580 steel H-piles. Foundation for the podium consisted of 540 steel H-piles and for the clubhouse 60 pre-bored socketted steel H-piles. This project was obtained by negotiation with the client given Tysan's good track record with the client. Despite the tight programme schedule, the project was completed on time.
